BORDEN LANDSCAPE DESIGN **STUNNING ENVIRONMENTS**

LANDSCAPES :: ENVIRONMENT :: STRUCTURES

BORDEN Landscape Design is transforming Sarasota neighborhoods, creating stunning environments above and beyond what most ever expect. BORDEN's unique landscapes are inspiring and meaningful, adding value not only to an architect's portfolio but for the homeowner who enjoys living within beautiful spaces where they can relax, play and entertain. "Excellence in site design, while using indigenous, native planting and hardscape materials in combination with rare subtropical accents, has become our hallmark" says the firm's principal and founder, Tim Borden. Tim is a south Florida native who works primarily with residential homeowners in Sarasota, Tampa Bay and Naples, having created outdoor spaces for the past 15 years since relocating to Sarasota after graduating from UF. Tim's focus is working with contemporary, modern and mid-century projects designed by the region's finest architects. Lauren Freeman, a landscape architecture graduate from Purdue, works directly with Tim and helps create amazing photo-realistic renderings for clients, as well as oversees project progress and quality control.

More of BORDEN Landscape Design's work can be found at their website, on Houzz and Instagram @borden_landscape_design
